GIANLUIGI LIGUORI

born on 1990

CLOUD SOLUTION ARCHITECT @ **Microsoft**

gianluigiliguori@live.it https://liguori.github.io

Profile

Cloud Solution Architect with deep expertise in designing and implementing enterprise-scale solutions on Azure. I specialize in Application Innovation, AI agent solutions, and modern development practices. Passionate about helping organizations transform through cloud-native architectures and AI-driven innovation.

I excel at bridging the gap between business requirements and technical solutions, leveraging Azure's full platform capabilities including PaaS, Serverless, Containers, and AI services. Expert in DevOps practices, GitHub & GitHub Copilot, CI/CD pipelines, Infrastructure as Code (IaC), and modern software engineering methodologies (Agile, Scrum, DevOps, Cloud Native, Microservices). I lead technical engagements, architect solutions, and empower development teams to build scalable, secure, and cost-effective cloud applications.

Skills

Language	C#; Visual Basic.NET; JavaScript; TypeScript; HTML5; CSS3; SQL; PHP;
Development tools	Visual Studio; Visual Studio Code; Git; NetBeans; Eclipse; SQL Server Management Studio; Toad; Azure Data Studio;
Technologies and Frameworks	Docker; Kubernetes; .NET; ASP.NET (Blazor, Razor Pages, MVC, SignalR, WebApi, Web Forms); EntityFramework; MAUI; Windows Forms; WPF; Angular; React; Ajax; jQuery; Bootstrap; NodeJS; Rest API; Web Services SOAP;
Database	SQL Server; Cosmos DB; MySQL; MongoDB; Access; PostgreSQL;
SDLC Platform	GitHub; Azure DevOps;
Platform	Azure (IaaS, PaaS, Serverless, Container); Linux; Windows; Android;

Education

2003 - 2008

High School Diploma: Computer Science obtained at Technical Institute “C.A. Dalla Chiesa” in Afragola (NA) with a final vote of 96/100

Certifications

Azure AI Engineer Associate, Azure Solution Architect Expert, Azure DevOps Engineer Expert, Azure Developer Associate, Azure Administrator Associate, Azure Fundamentals, Programming in C#, Microsoft Certified Trainer, GitHub Copilot

Work Experience

Period	2019 - Today
Company	**MICROSOFT**
Position (2022-Today)	**Cloud Solution Architect**
	I lead technical engagements in the Cloud and AI Solutions area, specializing in Application Innovation. I architect and guide the implementation of enterprise-scale solutions on Azure, helping customers leverage cutting-edge AI agent capabilities, modern application platforms, and DevOps practices. I conduct architectural design sessions, develop proof-of-concepts, and drive technical adoption of Azure services including AI, containers, serverless, and cloud-native architectures. I also empower development teams through GitHub and GitHub Copilot expertise, enabling them to build better software faster. **Technologies:** Azure AI Foundry (AI Models, Foundry Tools, AI Search), Application Innovation (App Service, Container Apps, AKS, Functions), DevOps & SDLC (Azure DevOps, GitHub, GitHub Copilot, GitHub Actions), Cloud Architecture (Microservices, Event-Driven, Serverless), Modern Development (.NET, Visual Studio, VS Code)
Position (2020-2022)	**App Innovation Customer Engineer**
	I am responsible for helping our customers get the best from their technology choices and development teams. My goal is simple, to excite and inspire Microsoft's customers.
Position (2019-2020)	**Premier Field Engineer**
	I provide leadership to development teams that are deploying solutions using the latest development tools and methodologies. I work together with experienced developers to ensure customers have the skills to develop, deploy and maintain their solution in line with industry best practices.
Period	2018 - 2019
Company	**INNOVAWAY**
Position	**Software Development Team Lead**
Projects	**- IoT MACHINES** **Description:** Development of an IoT application that runs on Linux embedded ARM64 based systems based on web technologies. Infrastructure implementation for OTA updates and monitoring (logs, provisioning, etc.) with web portal. **Technologies:** NodeJS, Javascript, HTML, Angular, Electron, rsyslog, RabbitMQ, ElasticSearch, Logstash, Kibana, Beats, hawkBit, SailsJS **- GLASSES E-COMMERCE PORTAL** **Description:** Development of an e-commerce portal for a leading international company in the optical industry. **Technologies:** C#, Javascript, HTML, SQL Server, ASP.NET, WCF
Period	2016 - 2018
Company	**EURIS GROUP s.p.a.**
Position	**Senior Software Developer**
Projects	**- CREDIT INFORMATION SYSTEM** **Description:** Development of a credit information system (CIS: an archive that contains data on loans requested and granted to individuals and businesses by banks and financial companies. **Technologies:** C#, SQL Server, ASP.NET Web Forms, Windows Forms

Contacts

with medical equipment for clinical analysis. Implementation of a PACS (picture archiving and communication system) for the storage, transmission, display and printing of digital diagnostic images in 3D and 4D using the DICOM standard.
Complete management of a warehouse (Revenue, Expenses, Lots, Stocks, Availability, etc.).
Technologies: Windows Form, Visual Basic.NET, SQL Embedded, HTML, CSS, SQL Server, WebServices SOAP, Crystal Report

-NOMOS
Description: Development of a software for the complete management of the law office with the sharing of deadlines using mobile devices.
Technologies: Windows Form, C#, SQL Embedded, Crystal Report, Sql Server, Windows Mobile, SQL Server CE

-Development of various web sites and other small projects.

Personal projects and Open Source

Project Name	**Organizer**
Location	https://github.com/liguori/organizer
Position	Founder and Software developer
Description	Appointment management tool
Technologies	Angular, TypeScript, ASP.NET Core, C#, Electron, EF Core, SQL Lite, Angular Material
Project Name	**Savings**
Location	https://github.com/liguori/savings
Position	Founder and Software developer
Description	Project your income into the future while also taking expenses into account
Technologies	Blazor, ASP.NET Core, EF Core and Electron
Project Name	**ChessBoard Plus**
Location	http://github.com/liguori/ChessboardPlus
Position	Founder and Software developer
Description	Implementation of the game of checkers, game mode against computer with artificial intelligence
Technologies	Visual Basic.NET, Windows Form
Project Name	**Tetris**
Location	http://github.com/liguori/Tetris
Position	Founder and Software developer
Description	Implementation of the Tetris game with the possibility of interface customization game
Technologies	C# , Windows Form
